**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5,7-11,13-15,18 are rejected under 35 U.S.C. 102(b) as being anticipated by Borowiak (6,240,662).

Borowiak discloses a plow 12 and an attachment 16 having an arcuate geometry, a longitudinal opening and a plurality of pins 46 as shown in figures 1,2,3,6. Concerning claim 13, Borowiak (col 1) discloses the adjustable positioning of plow blades.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 6,12,16,17 are rejected under 35 U.S.C. 103(a) as being unpatentable over (6,240,662) in view of Fletcher (5,082,065).

Borowiak discloses a plow assembly as described previously, but lacks specifying that the plow is positioned by a hydraulic actuator.

Art Unit: 3671

Fletcher teaches that it is old and well known in the art to use a hydraulic actuator (cylinder 62) to pivotally position a plow blade because hydraulic cylinders allow for precise positioning.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the device of Borowiak by using a hydraulic actuator to position the plow blade as taught by Fletcher since hydraulic actuators allow for precise positioning that is simple to design.

Concerning the limitations regarding the hemispherical members, the examiner takes official notice that it is known to mount hemispherical cap members on the ends of hollow tubular members (such as on posts) to prevent debris from entering the tubular member from an open end. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the device of Borowiak by mounting end caps on the ends of the tubular attachment, to prevent debris from entering the attachment from the open ends.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. It is noted that Shaw (6,895,982) discloses the use of end caps 22,26.
